

## DELL GIVES AUSTRALIANS CHOICE AND FREEDOM TO TALK, WATCH, SURF, AND CONNECT WITH NEW 5-INCH TABLET

Date: 24/09/2010  
SYDNEY, Australia

### NEWS:

- The Dell Streak will be available in Australia on 1 Oct from Optus for \$0 upfront on an AUD\$59 Cap† or AUD\$649 standalone.

### HITTING A SWEET SPOT

The Dell Streak, a carbon black Android-based tablet with a 5-inch display, is designed to provide an excellent on-the-go entertainment, social connection, and navigation experience. The spacious 5-inch screen is ideal for experiencing thousands of Android Market widgets, games and applications, all without squinting or compromising portability. Built-in Wi-Fi, Bluetooth capability and available mobile broadband brings easy access for downloading and listening to music, updating social networking status on the go, and staying connected to friends and family through e-mail, text, IM, and voice calls.

On-the-go students, mobile professionals, and active families will find Streak's web-browsing capabilities as natural as a laptop. The 5-inch screen is large enough to present Web pages in their natural form, create a comfortable viewing experience, and make turn-by-turn navigation simple. The Dell Streak is powered by Qualcomm's Snapdragon solution with integrated 1GHz processor to combine basic functionality and benefits of a laptop in a pocket friendly size.

The Dell Streak was designed with the future in mind to support future software, application and platform upgrades.

### QUOTES:

"Dell has found a way to fit Australians' whole world in a 5-inch screen. Dell Streak's unique size will help people down under discover new ways to enjoy the web, connect with friends, and navigate their lives." - Ron Garriques, president, Dell Communication Solutions.

"We're very excited about the Dell Streak coming to Optus and providing such a unique device to our customer base. The Optus Open Network is the perfect medium for people to experience the full functionality of a tablet, such as the Dell Streak," said Austin R. Bryan, director, Optus Digital Mobile.

Matt Telfer, Dell Australia's general manager for Indirect and Telecommunications Channels said, "Dell believes its entry into the mobility market in Australia will be best leveraged by the Dell Streak. It is not only the first Android-based tablet to be launched in Australia, but it is also a unique size and capable of delivering both a rich multimedia and voice experience on an Android platform."

According to recent independent research conducted in September 2010 by telecoms and media analyst firm Telsyte, tablet computing is set to explode in Australia. Foad Fadaghi, research director at Telsyte said, "We are seeing strong interest from consumers in tablet computing devices, with 28 per cent indicating a desire to acquire a tablet device, which is incredible for such a new form factor."+

When it comes to businesses' interest, Fadaghi said, "Thirty per cent of ICT business decision makers indicated they intend to adopt tablet computing within the next three years, while this figure grows to 40 per cent in larger enterprises."++
